TUESDAY
DAILY DESCRIPTIONS

BARTHOLOMEW ISLAND

GALAPAGOS
HABITAT | **1** |

(Departure)

(2 hours navigation
aprox.)

BARTHOLOMEW
ISLAND | **2** |

CHINESE HAT | **3** |

This is a very small volcano close to Santiago Island, surrounded by small spatter cones. It's one of the smallest Galapagos Islands but don't be fooled: it has an unique visitor site with an unforgettable view!

Bartholomew is an island surrounded by turquoise waters and beautiful beaches. The island is a now extinct volcano with a variety of red, orange, green, black and shiny volcanic formations.

What to see ?

Sea lions, "Santa Fe Iguana" endemic land iguanas, thick cactuses, Palo Santo, crabs, night herons, sea iguanas, mockingbirds and doves. Sea tortoises and stingrays, Galapagos penguins, Galapagos hawks.

What to do?

Trekking, snorkeling,
swimming.

WEDNESDAY
DAILY DESCRIPTIONS

**SOUTH PLAZA
ISLAND**

**GALAPAGOS
HABITAT | 1 |**
(Departure)

(2 hours navigation
aprox.)

SANTA FE | 3 |

Santa Fe Island, also called Barrington Island after British Admiral Samuel Barrington, is formed by uplifted, submarine basaltic lava, created some 4 million years' ago. A big part of this is a faulted plateau covered with a forest of giant Opuntia cactae.

**SOUTH
PLAZA | 2 |**

Created by lava that was uplifted from the sea bed, South Plaza has resident wildlife and diverse plant life.

What to see ?

The most spectacular plants are the giant prickly pear cactae, unique to Santa Fe (Opuntia echios barringtonensis). Galapagos dove, Galapagos hawk, Sea Lion nursery, land iguanas, marine iguanas. Birds such as blue-footed, nazca boobies, swallow-tailed gulls and tropical birds.
